GENERAL PAPER LAYOUT

When non-standard page sizing or margins are used in a final .pdf, the text will be adjusted to fit production requirements. This may cause situations such as text to be cut off or is re-sized too small to be clearly legible.

Issues that arise when not using standard page sizing:

-  A5 sizing
Text will be shrunk to fit and sometimes is cut off in production
-  Single column
Paper is pulled from production because this causes errors in processing.
-  Text runs into margin (*text will be shrunk or simply cut off during production*)

The easiest way to format the paper with the correct margins is to use the [templates](#) and avoid any overflow into margins.

Papers must be submitted in PDF only.

You will not have an opportunity to preview any changes nor submit revisions to a final .pdf.

-  8 ½" x 11" rather than A5 layout
-  Margins are .5 inches
-  Use provided templates
-  No text overflow into margins
-  All regular text is 10pt font
-  Conference paper is two columns
-  No highlights or colored text

MULTIPLE AFFILIATION LISTINGS AND FOOTNOTES

While the above general format is simple, authors often use somewhat more complicated formats to indicate that an author is affiliated with more than one organization.

When this is done, verification staff will use only the affiliation that appears first on the final paper.

¹Beijing Key Laboratory of Nonlinear Vibrations and Strength of Mechanical Structures,
College of Mechanical Engineering,
Beijing University of Technology
²Key Laboratory of Dynamics and Control of Flight Vehicle, Ministry of Education
Beijing 100124. P. R. China

Occasionally, an author is asked to include a footnote at the bottom of the first page to clarify an affiliation discrepancy between the author account and the final paper. This should be entered in the footnote.

lumbar spinal fusions continues to be one of the leading

* Now at Washington University, St. Louis, Missouri, USA

LISTING THE PARENT ORGANIZATION

When authors list departments or institutes that are subsidiary their primary affiliation in the author section below the title, staff will enter only the parent organization in verification. If it is unclear as to which name refers to the parent organization, staff will refer to the author account.

ABBREVIATIONS AND ACRONYMS

When authors **abbreviate** basic words like “University” in the author account or on the final paper, staff will spell the name fully in the verification listing.

Univ. of Engineering Science

University of Engineering Science

Authors often use **acronyms** in the author account and/or on the final paper. It is preferred to use full words for clarity, but staff will match whatever listing is on the paper.

NON-ENGLISH LANGUAGE AFFILIATION LISTINGS

Sometimes authors will list their primary affiliation in English in the account but list it in their country’s official language on the final paper.

It is acceptable to list an affiliation in English or in the country’s official language.

Staff may make changes to the wording if there are differences between authors on the same submission.

CITY, STATE AND CITY, COUNTRY LISTINGS

A City, Country or City, State (US) listing must be included for each author affiliation listed on the final paper.

Please refer to the table below for some additional details on the preferred formatting of city, state, and country listings:

US Listings (City, State)	Format
Do not include USA	Lincoln, NE, USA
State listings are required	Wichita, USA
All State listings in verification carry the standard abbreviation	Lincoln, NE

Washington, District of Columbia	List as Washington, DC (no periods. no spaces between letters)
Military bases and institutions can be used as city listings on the final paper. Abbreviations are acceptable.	Wright-Patterson AFB, OH WPAFB, OH U.S. Air Force Academy, OH
Canadian Listings (City, Province, Country)	Format
All Canadian listings must be in City, Abbreviated Province, Country format	London, Ontario, Canada → London, ON, Canada
Latin American Listings (City, Country)	Format
Do not include province	Rio de Janeiro, RJ , Brazil Zapopan, Jalisco , México
European Listings (City, Country)	Format
Do not include province in verification	Bilbao, Vizcaya , Spain
The Netherlands	List as Netherlands
Australian and New Zealand Listings (City, Country)	Format
Do not include province	Campbell, ACT , Australia
Asian Listings (City, Country)	Format
Do not include province	Hyderabad, Telangana , India Yokohama, Kanagawa , Japan
United Arab Emirates	List as UAE (no periods. no spaces between letters)
Kingdom of Saudi Arabia	List as Saudi Arabia
Peoples Republic of China	List as China (Mainland)
South Korea, Korea, North Korea	List as Korea

Republic of Korea	List as Korea
Singapore (alone)	Use Singapore
African Listings (City, Country)	Format
Do not include province	Johannesburg, Gauteng , South Africa
Republic of South Africa	List as South Africa
Congo	List as South Africa
Republic of the Sudan, North Sudan	List as Sudan

GENERAL TEXT

The body of the paper should be in Times New Roman size 10, right-justified, single-spaced, and in two columns. The margins should be .5 inches.

Section headers should be in Arial size 10, bold, and uppercase.

Abstract—This electronic document is a “live” template and already defines the components of your paper [title, text, heads, etc.] in its style sheet. ***CRITICAL: Do Not Use Symbols, Special Characters, Footnotes, or Math in Paper Title or Abstract.** (*Abstract*)

Keywords—component, formatting, style, styling, insert (*key words*)

I. INTRODUCTION (HEADING 1)

This template, modified in MS Word 2007 and saved as a “Word 97-2003 Document” for the PC, provides authors with most of the formatting specifications needed for preparing electronic versions of their papers. All standard paper components have been specified for three reasons: (1) ease of use when formatting individual papers, (2) automatic compliance to electronic requirements that facilitate the concurrent or later production of electronic products, and (3) conformity of style throughout a conference proceedings. Margins, column widths, line spacing, and type styles are built-in; examples of the type styles are provided throughout this document and are identified in italic type, within parentheses, following the example. Some components, such as multi-leveled equations, graphics, and tables are not prescribed, although the various table text styles are provided. The formatter will need to create these components, incorporating the applicable criteria that follow.

II. EASE OF USE

B. Maintaining the Integrity of the Specifications

The template is used to format your paper and style the text. All margins, column widths, line spaces, and text fonts are prescribed; please do not alter them. You may note peculiarities. For example, the head margin in this template measures proportionately more than is customary. This measurement and others are deliberate, using specifications that anticipate your paper as one part of the entire proceedings, and not as an independent document. Please do not revise any of the current designations.

III. PREPARE YOUR PAPER BEFORE STYLING

Before you begin to format your paper, first write and save the content as a separate text file. Complete all content and organizational editing before formatting. Please note sections A-D below for more information on proofreading, spelling and grammar.

Keep your text and graphic files separate until after the text has been formatted and styled. Do not use hard tabs, and limit use of hard returns to only one return at the end of a paragraph. Do not add any kind of pagination anywhere in the paper. Do not number text heads—the template will do that for you.

A. Abbreviations and Acronyms

Define abbreviations and acronyms the first time they are used in the text, even after they have been defined in the abstract. Abbreviations such as IEEE, SI, MKS, CGS, sc, dc, and rms do not have to be defined. Do not use abbreviations in the title or

ABSTRACT

The abstract should be about 200-400 words and listed in two column format the same as the general text sections.

An abstract can be listed in italics, but this is not required.

DO NOT use special characters, symbols, or footnotes in your abstract.

Keywords can be added in the abstract section at the end but are not required.

NOMENCLATURE

The nomenclature should be in Times New Roman size 10, justified, single-spaced, and in two column formats.

Be sure to optimize text and check symbols in Nomenclature

Before you submit your final PDF, please make sure to embed the fonts in the PDF. *Embedding fonts ensures all font information used to make your document look the way it does is stored in the PDF file.*

For instructions on how to embed a .pdf file please view: https://www.youtube.com/watch?v=Er_YlkoDB7g

Tables and Figures (graphics)

Using the proper dimensions for tables and figures will prevent them from interfering with gutter space (between the columns) and side margins.

C. Figures and Tables

a) Positioning Figures and Tables: Place figures and tables at the top and bottom of columns. Avoid placing them in the middle of columns. Large figures and tables may span across both columns. Figure captions should be below the figures; table heads should appear above the tables. Insert figures and tables after they are cited in the text. Use the abbreviation "Fig. 1", even at the beginning of a sentence.

TABLE I. TABLE TYPE STYLES

Table Head	Table Column Head		
	<i>Table column subhead</i>	<i>Subhead</i>	<i>Subhead</i>
copy	More table copy*		

We suggest that you use a text box to insert a graphic (which is ideally a 300 dpi TIFF or EPS file, with all fonts embedded) because, in an MSW document, this method is somewhat more stable than directly inserting a picture.

To have non-visible rules on your frame, use the MSWord "Format" pull-down menu, select Text Box > Colors and Lines to choose No Fill and No Line.

7 1/2 in. - to fit across the top of the page (span two columns)

9 x 7 1/2 in. (L x W) - to fit the entire page (top to bottom)

6 1/2 in. x 8 1/2 in. (L x W) - across the entire page sideways (avoid when possible)

All figures should be numbered consecutively and have a caption consisting of a brief title or description of the figure.

The number used to identify the figure should be used to refer to the figure throughout the text (ex. Fig. 2).

When the figure reference begins a sentence, the figure should be spelled out (ex. Figure 2).

All tables should be numbered consecutively and have a caption consisting of a brief title or description of the table.

TABLE I TABLE TYPE STYLES

Table Head	Table Column Head		
	<i>Table column subhead</i>	<i>Subhead</i>	<i>Subhead</i>
copy	More table copy*		

Graphics are sized to fit the width of the column.

Font inside graphics is viewable.

Lines in graphics appear (anything smaller than 1px may not appear correctly)

Figures do not interfere with the side or center margins.

Graphics are not surrounded by wrapped text. They stand on their own within the column.

Graphics and/or tables are not broken over two columns or two pages.

Equations and use of SI Units.

Authors are encouraged to include SI units of measurement in all papers.

When U.S. customary units are given preference, the SI equivalent should be provided in parentheses or in a supplementary table.

When preference is given to SI units, the U.S. customary units should be provided in parentheses or in a supplementary table.

C. Equations

The equations are an exception to the prescribed specifications of this template. You will need to determine whether or not your equation should be typed using either the Times New Roman or the Symbol font (please no other font). To create multileveled equations, it may be necessary to treat the equation as a graphic and insert it into the text after your paper is styled.

Number equations consecutively. Equation numbers, within parentheses, are to position flush right, as in (1), using a right tab stop. To make your equations more compact, you may use the solidus (/), the exp function, or appropriate exponents. Italicize Roman symbols for quantities and variables, but not Greek symbols. Use a long dash rather than a hyphen for a minus sign. Punctuate equations with commas or periods when they are part of a sentence, as in:

$$a + b = \gamma \quad (1)$$

Note that the equation is centered using a center tab stop. Be sure that the symbols in your equation have been defined before or immediately following the equation. Use "(1)", not "Eq. (1)" or "equation (1)", except at the beginning of a sentence: "Equation (1) is . . ."

Equations should be centered and numbered (1), (2), (3) and so on, with the number flush right in the column and a space before and after the equation.

Equations are numbered correctly.

Equations are sized to fit the width of the column.

Equation characters and symbols are pasted clearly and correctly.

All corrupt font is addressed and appears correctly, not as open squares.

No optimization errors occur in equations due to unrecognized symbols.

NO changes are permitted to equations, even if a mathematical error is discovered later.

Before you submit your final PDF, please make sure to embed the fonts in the PDF. *Embedding fonts ensures all font information used to make your document look the way it does is stored in the PDF file.*

For instructions on how to embed a .pdf file please view: https://www.youtube.com/watch?v=Er_YlkoDB7g

ACKNOWLEDGEMENTS

The acknowledgements are formatted the same as the body of the paper.

Text should be Times New Roman size 10, justified, single-spaced, and in two columns.

The margins should be .5 inches.

ACKNOWLEDGMENT (Heading 5)
The preferred spelling of the word “acknowledgment” in America is without an “e” after the “g”. Avoid the stilted expression “one of us (R. B. G.) thanks ...”. Instead, try “R. B. G. thanks...”. Put sponsor acknowledgments in the unnumbered footnote on the first page.

Acknowledgements are not required, but when used appear after the conclusion, but before references.

Sometimes this area is used to identify authors or agencies who contributed to the research but were not listed formally.

REFERENCES

Within the text, references should be cited numerically in the order of their appearance.

The numbered reference citation should be enclosed in brackets.

In the case of two citations within one sentence, the numbers should be separated by a comma [1,2]. In the case of more than two reference citations, the numbers should be separated by a dash [5-7].

References to original sources for cited material should be listed numerically together at the end of the paper in order of their appearance in the text. Do not reference footnotes.

REFERENCES

The template will number citations consecutively within brackets [1]. The sentence punctuation follows the bracket [2]. Refer simply to the reference number, as in [3]—do not use “Ref. [3]” or “reference [3]” except at the beginning of a sentence: “Reference [3] was the first ...”

Number footnotes separately in superscripts. Place the actual footnote at the bottom of the column in which it was cited. Do not put footnotes in the abstract or reference list. Use letters for table footnotes.

Unless there are six authors or more give all authors’ names; do not use “et al.”. Papers that have not been published, even if they have been submitted for publication, should be cited as “unpublished” [4]. Papers that have been accepted for publication should be cited as “in press” [5]. Capitalize only the first word in a paper title, except for proper nouns and element symbols.

The reference section is incorporated into the 2-column format shown in the template.

Citations are formatted in Chicago Style

For papers published in translation journals, please give the English citation first, followed by the original foreign-language citation [6].

REFERENCING CONFERENCE PAPERS

Last name, First Name. “Paper Title.” Conference Proceedings Title. Paper#, pp. Conference City, State, Conference Dates, Year, DOI. _Abstract URL_

Example

[4] Willson, Thready Z. and Carpenter, Dink D. “Structural Influences of Erosion based on Experimental Bracket Structure and Placement.” Proceedings of ASME IDETC/CIE. DETC2001-12344: pp. 332-338. Los Angeles, CA, August 5-9, 2001. DOI _____ . _____ abstract URL http://_____.

The author’s first and last names must be spelled fully and separated by a **comma**. Avoid using an initial to represent a first or last name.

Punctuate the name listing with a period. **Last name, First name.**

If there are two authors, separate their name with “**and.**” If there are more than two authors, use **series commas** and set the last name off with “**and.**”

Paper titles must be enclosed in **quotation marks**.

The article title is punctuated with a **period** that is contained within the quotation marks

The **name of the conference** should be spelled fully in *ITALICS*. Punctuate with a **period**

List the acronym/**paper number** immediately followed by a **colon**.

List the **hyphenated page numbers** using the abbreviation pp. Punctuate with a **period**.

Immediately following the **period** after hyphenated page numbers, list **the conference location (City, State abbreviation or country)** set off with a **comma**, followed by **the fully spelled month and hyphenated dates** of when the conference took place. Set hyphenated dates off with a **comma** and conclude with the **year**. Punctuate with a period.

If found in the ASME digital collection, using the acronym **DOI**, include the **full DOI number**. Punctuate with a **period**.

Following the **DOI number**, please include the **URL to the abstract page** (if accessible online). Punctuate with a **period**.

CONFERENCE HEADER

The conference details are updated by staff, do not worry about adding the correct specifics but please leave 5 lines of space before your paper title for this information.

Proceedings of the ASME 2019
International Mechanical Engineering Congress and Exposition
IMECE2019
November 11-14, 2019, Salt Lake City, UT, USA

IMECE2019-####

PAPER NUMBER

The conference prefix is specific to the conference and year of your submission.

The paper number is specific to your paper. This is typically 5 digits but will be updated by staff if the incorrect paper number is supplied on a final .pdf.

Proceedings of the ASME 2019
International Mechanical Engineering Congress and Exposition
IMECE2019
November 11-14, 2019, Salt Lake City, UT, USA

IMECE2019-####

Text for conference name and paper number is Arial size 16 font

Listed below the conference header

Provides the full paper number

Right aligned

Text is black

TITLE

The title on the final .pdf is what will be used, even if a different title was entered into the system at the time of submission.

This may also include any typos in the title that were listed on the final .pdf.

Submitting authors are responsible to check papers carefully before submitting a final .pdf. You will not be able to revise your paper, even if you later discover errors.

Paper Title* (use style: *paper title*)

*Note: Sub-titles are not captured in Xplore and should not be used

line 1: 1 st Given Name Surname line 2: <i>dept. name of organization (of Affiliation)</i> line 3: <i>name of organization (of Affiliation)</i> line 4: City, Country line 5: email address or ORCID	line 1: 2 nd Given Name Surname line 2: <i>dept. name of organization (of Affiliation)</i> line 3: <i>name of organization (of Affiliation)</i> line 4: City, Country line 5: email address or ORCID	line 1: 3 rd Given Name Surname line 2: <i>dept. name of organization (of Affiliation)</i> line 3: <i>name of organization (of Affiliation)</i> line 4: City, Country line 5: email address or ORCID	line 1: 4 th Given Name Surname line 2: <i>dept. name of organization (of Affiliation)</i> line 3: <i>name of organization (of Affiliation)</i> line 4: City, Country line 5: email address or ORCID

Author order is determined at abstract submission, but staff will follow the author order as listed on the final .pdf.

Notify copyright@asme.org if you need to change the author order prior to submitting a final .pdf.

Co-authors must verify the contact information at the abstract submission stage, all details in indexed sites will match what was approved by co-authors.

A. Authors and Affiliations

The template is designed for, but not limited to, six authors. A minimum of one author is required for all conference articles. Author names should be listed starting from left to right and then moving down to the next line. This is the author sequence that will be used in future citations and by indexing services. Names should not be listed in columns nor group by affiliation. Please keep your affiliations as succinct as possible (for example, do not differentiate among departments of the same organization).

1) *For papers with more than six authors:* Add author names horizontally, moving to a third row if needed for more than 8 authors.

2) *For papers with less than six authors:* To change the default, adjust the template as follows.

a) *Selection:* Highlight all author and affiliation lines.

b) *Change number of columns:* Select the Columns icon from the MS Word Standard toolbar and then select the correct number of columns from the selection palette.

c) *Deletion:* Delete the author and affiliation lines for the extra authors.

Text is Arial size 11

Authors with same affiliation can be listed together.

Affiliations should use the same format (abbreviations, punctuation and spelled out words)

When authors are grouped together the author order is read from top to bottom

When authors are listed next to one another, the author order is read from left to right

NOTE:

The author view that contains the copyright pending list is NOT reflective of the author order in our system.

AUTHOR INCONSISTENCIES

Your paper will be marked “non-publishable” if the authors listed in the system are not consistent with what is listed on the final .pdf. When available, author details will be applied to the system using SSO profiles.

It is a good idea to ensure your paper meets publication by ensuring the following common author inconsistencies are addressed as early as possible:

All authors in system are listed on the final .pdf

NO additional author is listed on final .pdf
Paper will be marked “non-publishable”

NO author in system is removed from final .pdf
Paper will be marked “non-publishable”

Authors names are spelled exactly as listed in the system
A new copyright agreement signature will be required if changes are made to author names

Authors names on .pdf are exactly as listed in system (including middle initials and punctuation)

Author names are listed on .pdf as the authors would like them displayed on publication sites.

Author name and initials used are consistent across other submissions by the same author

ADJUSTING AUTHOR ORDER

When a paper is submitted ,you will not be able to make any changes to the order of authors that are listed in our system.

Sometimes we are asked about the order authors are listed in the actions needed screen, but this screen lists the authors in alphabetical order and is not reflective of the order that authors will appear.

In cases where author changes to the author order are necessary, you will need to contact copyright@asme.org to ask ASME staff to open the system for you to make the necessary adjustments.

The system won't be opened for you to make changes if any of the following conditions apply:

The deadline for submitting a final .pdf has passed.

You've already submitted a final .pdf and the order in the system matches the order on your final .pdf.

Only the author who entered the submission will be able to make these types of edits. The lead author will need to log in using the link provided when the link is opened for changes. This link will only work to make changes one time and is usually scheduled to close automatically at an established date.

Go to your completed submission and click "edit".

Go to "Authors" link at the top of the page.

[Submitter Information](#) → [Abstract Submission](#) → [Authors](#)

If it is not selected already select the "Questions" tab.

Use the arrows to the left of each author entry to drag and drop the authors until they are listed in the order they will be listed on your final .pdf.

Scroll to the bottom of the screen and click "Save". This will update the author order.

AFFILIATIONS

Staff will only use the first affiliation for authors with more than one listed affiliation, so list the authors primary affiliation first.

Use only parent affiliations as the name of organization in line 3

DO NOT use department names as part of the affiliation

Arial size 10.

Authors with the same affiliation can be identified by subscript numbering (see example below).

Amir Icahn³, Sue Satie², Mack Gonagall¹, Anne G. Nears¹

¹ASME, New York, NY

²University College of Applied Sciences, Gaza City, Palestine

³University of Ottawa, Ottawa, ON, Canada

Authors can also be listed individually (see example below)

line 1: 1st Given Name Surname
line 2: *dept. name of organization (of Affiliation)*
line 3: *name of organization (of Affiliation)*
line 4: City, Country
line 5: email address or ORCID

line 1: 2nd Given Name Surname
line 2: *dept. name of organization (of Affiliation)*
line 3: *name of organization (of Affiliation)*
line 4: City, Country
line 5: email address or ORCID

line 1: 3rd Given Name Surname
line 2: *dept. name of organization (of Affiliation)*
line 3: *name of organization (of Affiliation)*
line 4: City, Country
line 5: email address or ORCID

line 1: 4th Given Name Surname
line 2: *dept. name of organization (of Affiliation)*
line 3: *name of organization (of Affiliation)*
line 4: City, Country
line 5: email address or ORCID

line 1: 5th Given Name Surname
line 2: *dept. name of organization (of Affiliation)*
line 3: *name of organization (of Affiliation)*
line 4: City, Country
line 5: email address or ORCID

line 1: 6th Given Name Surname
line 2: *dept. name of organization (of Affiliation)*
line 3: *name of organization (of Affiliation)*
line 4: City, Country
line 5: email address or ORCID

Affiliation listings will not change the author order.

Affiliation changes will impact copyright agreements if changed. Please notify copyright@asme.org if you need to change the author affiliation prior to submitting a final .pdf.

We will use the full name of affiliations whenever this is possible, but if only acronyms are provided then this is the information that will be provided on the indexed sites.

Match the spelling for the same affiliations for authors from the same agency (including initials and symbols)

Please notify copyright@asme.org if any misspelling is in the submission system so this can be addressed prior to copyright agreements being sent for signature

The contact author can list his/her email address in a footnote at the bottom left of the first page

When information in system provided by author does not match .pdf we will default to the information on author Single Sign on (SSO) accounts.
